

Thanks for downloading Squisher.

All image processing runs 100% locally on your Mac. No uploads, no accounts, no tokens, no risks.

// 01 INSTALLATION

Install Squisher

- 1

Drag to Applications
Drag Squisher.app into your Applications folder.
- 2

First launch
Right-click Squisher.app → Open → click Open to bypass Gatekeeper on first launch.

// 02 QUICK START

3 image processes

- 1

Configure your image processes
Toggle Optimize, Resize, and Convert on or off.
- 2

Drop files into the Squish Zone
Drag images in, or click the "SquishZone" to add images. Image processing starts immediately!

_Ready

Output folder is created next to your originals. Your source files are never modified.

// 03 LICENSE ACTIVATION

Activate your license

- 1

Open Settings
Press ?/ key or the gear icon in the top-right corner.
- 2

Click "License"
Paste the key from your Squisher purchase receipt (via Lemon Squeezy).
- 3

Activate
Squisher verifies your key and unlocks maxed-out batch processing.

// 04 FEATURES

What Squisher can do

- **Optimize**

— Decrease image file size without any noticeable quality loss. Compression is adjustable.
- **Resize**

— Scale up or down by %, max width, or exact width.
- **Convert**

— Output to JPG, PNG, WebP, GIF, AVIF, and TIFF.
- **Privacy Mode**

— Strip private GPS, camera data, and timestamps from every output.
- **Accepted Formats**

— HEIC, SVG, JPG, PNG, WebP, GIF, AVIF, and TIFF.
- **Transparency**

— Preserved in PNG, WebP, GIF, AVIF, and TIFF.
